EXPERIENCE

Ecotech Windows & Doors – Toronto, Canada

Junior Full Stack Web Developer | LAMP Stack

August 2022 – Present

Completed Duties & Responsibilities

- Improved the software quality by upgrading it to latest framework and moving the vanilla website to Laravel 9 with Vue-JS (*Latest*).
- Successfully integrated Calendly using API with the existing website using JQuery, AJAX & PHP to automate the sales process from salesperson live location using Google Map API.
- Created automation module through which clients can book appointment & nearest salesperson is allocated to the clients.
- Solved 85% of tickets and bugs from the software in minimal time.
- Modifying the existing CRM website as per the requirement using VueJS, JQuery & PHP.
- Integration with Telnix API for SMS service and merging it with Calendly Leads.
- Worked with team members to build a quality software using Source Tree and using Git-Version-Control System (*Initial Stage*).
- Developing Front-end and Back-end using LAMP Stack and Agile Methodology.
- Manage, optimise, and update PHP Database (MySQL) according to requirement.
- Integrated REST API, built payment Gateways and Integrated Webhooks
- Maintaining and handling server by adding newcomers and providing specific domain email.
- Creating various scripts for CRON Jobs and achieving 100% customer satisfaction by communicating and fulfilling the needs of Sales department.

SKILLS

- ✓ **Building Responsive Websites:** Using HTML, CSS, JavaScript, PHP and latest technologies such as Bootstrap, VueJS, ReactJS, Laravel and MySQL/SQL Database.
- ✓ **Extensive Web Developer:** With an ability to develop websites using CMS such as WordPress development, Shopify, OpenCart & Magento.
- ✓ **Collaboration:** My previous experience Ecotech Windows & Doors can be helpful in collaborating with new people. I believe, teamwork is key to quickly solving problems and meeting deadlines.
- ✓ **Strong Understanding of Algorithms & SDLC (Software Development Life Cycle):** Helps me to understand the existing flow of any website which makes easy to modify the existing website or creating new module or integrating new module to existing website.

Diploma in Computer Engineering; Cumulative GPA: 8.4/10.0

Distinction

COMPLETED PROJECTS AND UPCOMING PROJECTS

1) Contract Creator

December 2022

[View Live Application](#)

- Built on Vanilla JS, Vanilla PHP
- Built for Demo Purpose, useful for businesses that need to create contract and send to customer to sign the contract.
- Special Features: Eliminates the subscription plans, can be used for Contract signature, useful in sending contracts, agreements or any legal terms to customers and store the response in Database.
- Tech Used: HTML5, CSS3, JS, JQuery, GitHub, fpdf

2) Portfolio With Admin

January 2023

Currently Working

- Built on Laravel
- A modifiable portfolio from Admin Panel. This project includes portfolio and admin panel to modify it.
- Features:
 - Track number of visitors on site.
 - Modify the portfolio without coding.
 - Get submitted response and email directly to users from admin panel.
 - Add Projects, Income, Expense of business.
 - Get graphical views on Income and Expenses to track business profit.

Adding new if possible..

Dead-Line April 2023
