PRATIK MORE

Full Stack PHP Developer

Toronto, ON | P: +1 (249) 989 1684 | morepratik1616@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Experienced Full Stack PHP Developer with expertise in LAMP stack, HTML, CSS, JavaScript, PHP, MySQL, and Bootstrap. Skilled in automating up to 60% of business processes and crafting responsive websites that effectively showcase business outcomes. Collaborative, results-driven, and adept at solving complex problems. Seeking a challenging full stack developer role in a fast-paced environment where I can develop innovative solutions and drive business growth.

EXPERIENCE

Freelance Full Stack PHP Developer | LAMP Stack   *January 2023 – Present*

Projects   Updated on Portfolio Projects

Achievements

- Build Contract Creator website, that can generate contracts for the user using PHP, JQuery, AJAX, Bootstrap and HTML, CSS.
- Developed and launched a website that automates the contract writing process, allowing users to easily create and send contracts to clients for signature.
- Built the website with flexibility in mind, enabling easy integration with a company's existing workflow and processes for seamless contract management.
- Designed a user-friendly interface that simplifies the contract creation and signing process, resulting in increased efficiency and reduced turnaround times.
- Building Websites based on Laravel 9, React JS and Vue JS, familiar with useful libraries such as Laravel OAuth, React axios and internal frameworks like LiveWire.

Full Stack Web Developer | LAMP Stack   *August 2022 – February 2023*

EcoTech Windows & Doors – Toronto, Canada

Achievements

- Integrated Calendly API using jQuery, AJAX, and PHP to enable booking appointments with leads and achieve 100% client retention.
- Added functionality to automate lead generation using various technologies resulting in 10 leads generated daily from landing pages and boosted business processing.
- Resolved 85% of software tickets and bugs in minimal time, reducing business hurdles.
- Created EcoBot, an automated response system that uses Telnyx API to confirm client appointments and reduce the risk of losing clients, responding to approximately 10 leads every day.
- Collaborated with the team to achieve 100% client retention rate by utilizing Git and SourceTree to efficiently solve issues with the CRM website, effectively eliminating all obstacles encountered during client interactions.
- Utilized Financit API to streamline the loan process, cutting out 75% of paperwork and leading to a 30% boost in client numbers.
- Implemented a custom web page with webhook functionality to address the issue of contract signing, enabling the direct delivery of contracts to customers via email, resulting in a 50% reduction in the workload of Sales Executives.

SKILLS

- Built automated micro-services using HTML, CSS, JavaScript, PHP, MySQL, JQuery, and Bootstrap to automate 60% of business processes.
- Crafted responsive websites on Laravel and PHP that effectively showcase business outcomes and track 90% of business models.
- Collaborated with team members to help solve problems quickly, meet deadlines, and handle various responsibilities.
- Proficient in data structures, algorithms, SDLC, and ER modeling, enabling the successful creation and launch of highly scalable applications.
- Proficient in developing and deploying websites and applications from the ground up, including server maintenance and deployment on live servers.
- Proficient in developing and designing client and server side architecture.
